

2/13/2013

The following chart is provided to demonstrate existing outfitted turkey and waterfowl hunting use history and the impact of rule Option C. In the two regions where existing outfitted turkey and waterfowl hunting have been grandfathered in under the moratorium, licensed waterfowl outfitters in region 6 on the average have provided only 93 of the 376 client use days that would be available to them under this. Licensed Turkey outfitters in regions 1 and 2 on the average provided only 23 of the 355 hunter opportunities that would be available. In contrast, on the average, there are 12,544 public waterfowl hunting use days and 11,849 public turkey hunters in these regions.

Under this rule, 5 individual outfitters could qualify for 32 and 39 turkey hunting opportunities in Region 1 and 2 respectively. Also 5 individual outfitters could qualify for 75 waterfowl client day opportunities in Region 6. In regions 2 and 6 currently, four of the five opportunities are filled by grandfathered licensed outfitters.
